

## Upgrading Section-6 Pictures of a Sector-*nn*

1. On the web, in the miscellaneous folder, create folders named `config_1`, `config_2`....`config_11`, and `sector_36`, `sector_37`.....`sector_40`. For each of these folders, create a subfolder named “small”. The folders will have large size pictures and the subfolders will have thumbnails with identical names.
2. If necessary upgrade the pictures in the `config/sector` folder that the Sector-*nn* belongs to. Do not forget to upgrade the thumbnails in the “small” subfolder.
3. Open the `config/sector` folder in a window (window-1). It will have 10 jpeg pictures and a “small” subfolder. Click on the “small” subfolder. It will have 10 jpeg picture files.
4. In a separate window (window-2), open the web folder [www.aps.anl.gov/asd/me/SR03/sectornn](http://www.aps.anl.gov/asd/me/SR03/sectornn)

(Note that `U:\1_www-me` = [www.aps.anl.gov/asd/me](http://www.aps.anl.gov/asd/me))

5. Select all picture files in the “small” subfolder and paste them in the web’s “`../SR03/sectornn`” folder.
6. Now open the web folder (window-2) [www.aps.anl.gov/asd/me/SR03/large/sectornn](http://www.aps.anl.gov/asd/me/SR03/large/sectornn)
7. Go back to `config/sector` folder (window-1) and select all picture ( an easy way to select is to select the “small” folder, and then invert the selection), copy the picture files, and paste them in the web’s `sectornn` folder (window-2): “`../SR03/large/sectornn`”
