

Subject: Storage Ring ACIS Chain C Remote Bypass Modification

Date: December 7, 2004

Attendees:

Greg Markovich	Phil McNamara
Anne Boron	Ken Belcher
Nick Friedman	Van Nguyen
Roger Hogrefe	Tom Dawson
John Forrestal	Roy Emerson
Jon Hawkins	

Roger Hogrefe presented a proposal to modify the Storage Ring ACIS by adding a remote Chain C zone bypass in the MCR. Roger first gave a brief explanation of the Storage Ring Chain C and displayed overheads of the present system. He then presented his modification and the validation process required to assure the ACIS's integrity after installation. The floor was then opened for questions. After answering several questions a poll of everyone in the group was taken and a unanimous decision to install the modification as presented was made. All presentation documentation is attached.
